JIM ROGERS

Investor, Financial
Commentator & Author

*One of the world's most acclaimed
and successful financial investors --
adventurer, story-teller and
best-selling author*

JIM ROGERS

about

Jim has been called many things; controversial, outspoken, irreverent ... but his **success** has been **indisputable** -- and most of **his predictions have proved to be right.**

Jim Rogers is literally **a legend** in his own lifetime, evolving from fabulously **successful Wall Street investor**, co-founder of the **Quantum Fund** and creator of the **Rogers International Commodity Index (RICI)** to **global adventurer** and **speaker**. He 'retired' at 37 to travel the world -- on a motorbike -- which helped to refine his **investment philosophy** to get out from behind the computer screen and see how the real world works in order to understand where opportunities lie.

In 2007, he moved to **Singapore** with his family, anticipating the coming of the **"Asia Century"** and which he continues to invest in. In 2011, he started a new **index fund** which focuses on the top companies in **agriculture, mining, metals and energy sectors** as well as those in the **alternative energy** space including solar, wind and hydro: **The Rogers Global Resources Equity Index.**

JIM ROGERS

his views

Drawing on lessons and observations from his lifetime in the markets, Rogers believes that **Asia** will be the **dominant economic force** in the twenty-first century, America and the European Union are in decline, and talks about **what we need to do** to right our economy and society.

Through his travel around the world, he offers glimpses of **political** and **economic history** that seemed to influence his decision-making process as well. An advocate of getting rid of the Federal Reserve, Rogers is clearly a man who buys into the idea that **those who don't learn from history are doomed to repeat it.**

Jim is a firm believer in long-term investment in **commodities, agriculture** and in **Asia**. Above all, he is bearish on **China**, bullish on **Russia**, believes **Japan** is headed for an economic downturn and persistently makes a case for investing in **North Korea**.

Jim candidly shares his observations, **stories of his success**, his **strongly-held views** on today's **financial systems, political leadership** and modern **economic thinking.**
